ABOUT ME

- Detail-oriented, execution-focused servant leader with a broad range of technical knowledge.
- Experienced in owning customer-facing business-critical services, products, and systems that serve the financial industry.
- 12+ years of experience in the banking industry offering insights on design, sizing, implementation, test strategy, defect triage, and project retrospectives. 5+ years' experience leading & managing teams of ICs, and 8+ years as a developer.
- Delivered products in multiple vendor platforms, team sizes, and timelines.
- Passionate about leadership, growth, and continual improvement of people, culture, and teams.
- Always pushing to drive efficiency and increase value across all areas of the business.
- Experienced working in dynamic cross-discipline agile geo-distributed environments.
- Have shipped ATM application features on multiple vendors and hardware platforms, on team sizes ranging from 5 to 15+ people(dev, QA, technical publications) with development cycles ranging from 1 month to 1+ years.
- Always eager to learn new technologies as per employer demands.

PROFESSIONAL EXPERIENCE

SOFTWARE DEVELOPMENT MANAGER
DieboldNixdorf, Canada

APRIL 2023 – PRESENT

Leading product team consists of developers, QA, technical publications, and product owner responsible for multi-vendor ATM application.

Responsibilities include, but are not limited to:-

- Act as point of escalation(production issue) for a Tier 1 multi-national bank, dealt with issue resolution on priority basis, presented solutions to customer executives & tech teams, thus increasing trust and satisfaction
- Owned feature developments and release work of VCP6 ATM application(source of 14% revenue of overall banking application revenue in DN).
- Delivered on date-driven features supporting multiple customer needs
- Improved product by reducing tech debt and product readiness.
- Drives 1:1's, mentoring, career planning, performance reviews, and recruitment of developers. Developed comprehensive training programs to onboard new team members and enhance existing skill sets, fostering a culture of continuous learning and development.
- Operates in, and drives for, a highly collaborative dynamic environment with Product Managers, Product Owners, architects and cross-functional teams.
- Acts as SME to architects, senior stakeholders and /or other team members
- Write epics and detailed user stories to populate the product backlog.
- Estimate stories in the backlog to facilitate release planning, project approvals and prioritization.
- Conduct Sprint planning, task assignments, retrospectives, and presentation of product increments, backlog refinement with product owners.
- Performed code repos ESCROW process for DieboldNixdorf
- Hands-on-coding, code reviews, participation in solution design to help development team's progress in assigned project.

SENIOR SOFTWARE ENGINEER (TEAM LEAD)

DieboldNixdorf, Canada

APRIL 2018 – MARCH 2023

- Contributes in concept-to-launch of commercial banking application's new features.
- Expertise in root cause analysis (RCA) and solving deep technical challenges
- Provided expert guidance as a technical lead, facilitating the implementation of new functionalities and resolving technical issues effectively.
- Designed and implemented innovative product features, leveraging advanced technologies and best practices to enhance product offerings.
- Managed code reviews and conducted structured walkthroughs for customers, ensuring the delivery of high-quality solutions that met or exceeded expectations.
- Grooming assigned epics, meticulously aligning solutions with client requirements and project timelines, as well as authoring required user stories.
- Ensures products meet or exceed client expectations. Excels at gathering feedback and requirements; communicating needed changes to the development team; and overseeing seamless, high-quality rollouts to on-time and on-budget conclusions.
- Conduct Sprint planning, task assignments, retrospectives, and presentation of product increments

Process Improvements:

1. Established processes for server changes as well as documenting, saving 10% man-hours for new individuals to ramp up
2. Established process standards for defect delivery & communication between dev & QA that reduced 30% churn of back & forth communication, resulting in better productivity.

SOFTWARE ENGINEER

DieboldNixdorf, Canada

FEB 2013 – MARCH 2018

- Conducted thorough analysis and modifications of existing systems, encompassing coding, testing, debugging, and installation processes, to optimize system performance and functionality.
- Collaborated with project teams to provide innovative solutions and recommendations for implementing new functionalities or resolving technical issues within developed systems, contributing to the overall success of projects.
- Developed high-quality program code adhering to prescribed specifications and standards, ensuring robustness, reliability, and scalability of software solutions.
- Conducted comprehensive code reviews and structured code walkthroughs for customers, ensuring compliance with coding standards and best practices, and facilitating effective knowledge transfer and customer satisfaction.

RESEARCH ASSISTANT

ORCA Lab, Western University, London, ON

SEPT 2009 – DEC 2012

- Perform research on computer algebra topics
- Write scientific reports based on research findings and results
- Public speech and poster presentation in conferences
